

What are the available posts in the USA?

- We have various job openings available in farming, including planting, harvesting, cattle farming, mechanics, and driving. There are also a few positions available in fish farming, pheasant farms, and greenhouses.

Can a friend and I work on the same farm?

- There are only a certain number of workers allowed for each farmer. The choice of worker is ultimately finalized by the farmer.

- Although we do strive to assist in placing friends with one another, this is not always possible and we also cannot give any guarantees.

- Please discuss the possibility with us as soon as your online CV has been completed and we can keep it in mind when we submit our suggestions to the farmer.

Are there work possibilities for ladies?

- Posts for ladies are very limited and it is very difficult to obtain work for ladies on the farms.

- There are factors that need to be kept in mind and which play a role when a lady is employed.

-The employers would have to supply separate accommodation for the ladies and most of the employers only have 1 house, thus they prefer men so that they can all stay together.
